Investment objective and policy

The investment strategy of Albion Venture Capital Trust PLC (the “Company”) is to manage the risk normally associated with investments in smaller unquoted companies whilst maintaining an attractive yield, through allowing investors the opportunity to participate in a balanced portfolio of asset-backed businesses. The Company’s investment portfolio will thus be structured to provide a balance between income and capital growth for the longer term.

This is achieved as follows:

- qualifying unquoted investments are predominantly in specially-formed companies which provide a high level of asset backing for the capital value of the investment;
- the Company invests alongside selected partners with proven experience in the sectors concerned;
- investments are normally structured as a mixture of equity and loan stock. The loan stock represents the majority of the finance provided and is secured on the assets of the portfolio company. Funds managed or advised by Albion Ventures LLP typically own 50 per cent. of the equity of the portfolio company;
- other than the loan stock issued to funds managed or advised by Albion Ventures LLP, portfolio companies do not normally have external borrowings.

The Company offers tax-paying investors substantial tax benefits at the time of investment, on payment of dividends and on the ultimate disposal of the investment.

Background to the Company

The Company is a venture capital trust which raised a total of £39.7 million through an issue of Ordinary shares in the spring of 1996 and through an issue of C shares in the following year. The C shares merged with the Ordinary shares in 2001. The Company has raised a further £15.2 million under the Albion VCTs Top Up Offers since 2011.

On 25 September 2012, the Company acquired the assets and liabilities of Albion Prime VCT PLC (“Prime”) in exchange for new shares in the Company. Each Prime shareholder received 0.8801 shares in the Company for each Prime share that they held at the date of the Merger.

The financial summary above is for the Company, Albion Venture Capital Trust PLC Ordinary shares only. Details of the financial performance of the C shares and Albion Prime VCT PLC, which have been merged into the Company, can be found on pages 20 and 21.

In addition to the dividends summarised above, the Directors have declared a second dividend for the year to 31 March 2016 of 2.50 pence per share, to be paid on 31 December 2015 to shareholders on the register as at 11 December 2015.

Notes

- Dividends paid before 5 April 1999 were paid to qualifying shareholders inclusive of the associated tax credit. The dividends for the year to 31 March 1999 were maximised in order to take advantage of this tax credit.
- All dividends paid by the Company are free of income tax. It is an H.M. Revenue & Customs requirement that dividend vouchers indicate the tax element should dividends have been subject to income tax. Investors should ignore this figure on their dividend voucher and need not disclose any income they receive from a VCT on their tax return.
- The net asset value of the Company is not its share price as quoted on the official list of the London Stock Exchange. The share price of the Company can be found in the Investment Companies - VCTs section of the Financial Times on a daily basis. Investors are reminded that it is common for shares in VCTs to trade at a discount to their net asset value.

Interim management report

Introduction

The results for Albion Venture Capital Trust PLC (the "Company") for the six months to 30 September 2015 showed a total return of 3.7 pence per share, up from 1.1 pence per share for the same period last year. This positive return was a result of uplifts in the third party professional valuations of our hydroelectric schemes and of Radnor House School, as well as an offer received for Kensington Health Clubs Limited. The net asset value for the half year was 72.7 pence per share compared to 71.6 pence per share at 31 March 2015.

Investment performance, progress and prospects

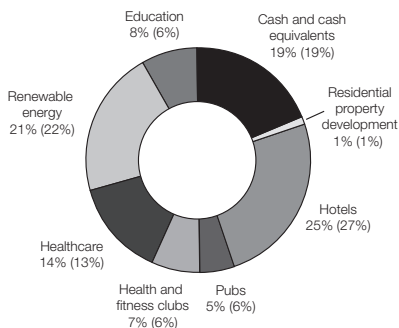

During the period, just under £2 million was invested in qualifying investments including £1.3 million in two of the three new care homes that we are currently building and £460,000 into Radnor House to help purchase Combe Bank School in Sevenoaks, Kent. Further sums were invested after the half year to fund the further construction of the care homes. £550,000 was received back from our investee companies in the form of loan stock repayments during the period.

Looking forwards, the main focus of our investment activity will be the further construction costs of our three care home projects in Oxford, Reading and Hillingdon (West London), all of which are proceeding according to plan. They are due to open between March and June of next year and we are currently optimistic for their prospects.

In terms of trading progress, the sentiment across the portfolio is generally positive. The Stansted Holiday Inn Express is currently trading at strong levels, while our renewable energy portfolio has been boosted by the two new hydroelectric schemes in Scotland which are trading above budget. Meanwhile, Radnor House, which recorded good GCSE results, saw a continued increase in the number of pupils to 390, while Combe Bank is trading in line with expectations.

Split of portfolio by valuation as at 30 September 2015

Set out below is the sector diversification of the investment portfolio as at 30 September 2015. At that date healthcare and renewable energy investments accounted for approximately 14 per cent. and 21 per cent. of the Company's portfolio including cash.

Changes in VCT legislation

The July budget introduced a number of changes to VCT legislation, including restrictions over the age of investments, a prohibition on management buyouts or the purchase of existing businesses and an overall lifetime investment cap of £12m from tax-advantaged funds into any portfolio company. While these changes are significant, the Company has been advised that had they been in place previously they would have affected only a relatively small minority of the investments that we have made into new portfolio companies over recent years. The Board's current view is that there will be no material change in our investment policy as a result.

Risks and uncertainties

The outlook for the UK economy continues to be the key risk affecting your Company, even though it continues to show growth ahead of its main European peers. The Company's general policy remains that its portfolio companies should not normally have external borrowings and for the Company to have a first charge over portfolio companies' assets; the Board and Manager see this as an important factor in the control of investment risk. However, on an exceptional basis, certain portfolio companies may take on external

Interim management report (continued)

borrowings, where the Board considers this will offer a significant benefit to the Company.

Other risks and uncertainties remain unchanged and are as detailed on pages 12 and 13 of the Annual Report and Financial Statements for the year ended 31 March 2015.

Transactions with the Manager

Details of the transactions that took place with the Manager during the period can be found in note 5.

There are no related party transactions or balances that require disclosure.

Discount management and share buy-backs

It remains the Board's primary objective to maintain sufficient resources for investment in existing and new portfolio companies and for the continued payment of dividends to shareholders. Thereafter, it is still the Board's policy to buy back shares in the market, subject to the overall criterion that such purchases are in the Company's interest. The total value bought in for the period to 30 September 2015 was £459,000. Subject to first purchasing shares held by the market makers, the Board will target such buy-backs to be in the region of a 5 per cent. discount to the most recently announced net asset value, so far as market conditions and liquidity permit.

Results and dividends

As at 30 September 2015, the net asset value of the Company was £51.8 million or 72.7 pence per share compared to £46.9 million or 71.6 pence per share at 31 March 2015. The revenue return before taxation was £836,000, compared to £699,000 for the six months to 30 September 2014. The Company will pay a second dividend of 2.5 pence per share on 31 December 2015 to shareholders on the register as at 11 December 2015, making 5.0 pence per share in total for the full year, in line with your Company's current dividend target.

Albion VCTs Prospectus Top Up Offers 2015/16

On 17 November 2015 your Board, in conjunction with the boards of other VCTs managed by Albion Ventures LLP, has launched a top up offer of new Ordinary shares. The Company is aiming to raise circa £4.25 million out of a target of £25.5 million in aggregate that the Albion VCTs are seeking to raise. In addition, the Board may elect to allot up to a further £1.75 million if there is sufficient demand and the Board deems it prudent to do so. The proceeds will be used to provide further resources at a time when a number of attractive investment opportunities are being seen. A Securities Note, which forms part of the Prospectus, will be posted to shareholders shortly.

Comparative figures have been extracted from the unaudited Half-yearly Financial Report for the six months ended 30 September 2014 and the audited statutory accounts for the year ended 31 March 2015.

The accompanying notes on pages 13 to 19 form an integral part of this Half-yearly Financial Report.

The total column of this Condensed income statement represents the profit and loss account of the Company. The supplementary revenue and capital columns have been prepared in accordance with The Association of Investment Companies' Statement of Recommended Practice.

All revenue and capital items in the above statement derive from continuing operations.

There are no recognised gains or losses other than the results for the periods disclosed above. Accordingly a Statement of comprehensive income is not required. The difference between the reported return on ordinary activities before tax and the historical profit is due to the fair value movements on investments. As a result a note on historical cost profit and losses has not been prepared.

Notes to the condensed Financial Statements

1. Basis of preparation

The condensed Financial Statements have been prepared in accordance with the historical cost convention, modified to include the revaluation of investments, in accordance with applicable United Kingdom law and accounting standards, including Financial Reporting Standard 102 ("FRS 102"), and with the 2014 Statement of Recommended Practice "Financial Statements of Investment Trust Companies and Venture Capital Trusts" ("SORP") issued by the Association of Investment Companies ("AIC"). This is the first period in which the financial statements have been prepared under FRS 102. On adoption of and in accordance with FRS 102, loans and receivables previously measured at amortised cost using the effective interest rate method less impairment have been classified as fair value through profit and loss ("FVTPL"). This has not led to a material change in value and so has not led to a restatement of comparatives.

The half-yearly report has not been audited, nor has it been reviewed by the auditor pursuant to the FRC's guidance on Review of interim financial information.

2. Accounting policies

Fixed asset investments

The Company's business is investing in financial assets with a view to profiting from their total return in the form of income and capital growth. This portfolio of financial assets is managed and its performance evaluated on a fair value basis, in accordance with a documented investment policy, and information about the portfolio is provided internally on that basis to the Board.

Upon initial recognition (using trade date accounting) investments are classified by the Company as 'at fair value through profit or loss' and are included at their initial fair value, which is cost (excluding expenses incidental to the acquisition which are written off to the income statement).

Subsequently, the investments are valued at 'fair value', which is measured as follows:

- Unquoted investments, where there is not an active market, are valued using an appropriate valuation technique in accordance with the IPEVCV Guidelines. Indicators of fair value are derived using established methodologies including earnings multiples, the level of third party offers received, prices of recent investment rounds, net assets and industry valuation benchmarks. Where the Company has an investment in an early stage enterprise, the price

of a recent investment round is often the most appropriate approach to determining fair value. In situations where a period of time has elapsed since the date of the most recent transaction, consideration is given to the circumstances of the portfolio company since that date in determining fair value. This includes consideration of whether there is any evidence of deterioration or strong definable evidence of an increase in value. In the absence of these indicators, the investment in question is valued at the amount reported at the previous reporting date. Examples of events or changes that could indicate a diminution include:

- the performance and/or prospects of the underlying business are significantly below the expectations on which the investment was based;
- a significant adverse change either in the portfolio company's business or in the technological, market, economic, legal or regulatory environment in which the business operates; or
- market conditions have deteriorated, which may be indicated by a fall in the share prices of quoted businesses operating in the same or related sectors.
- Investments listed on recognised exchanges are valued at their bid prices at the end of the accounting period or otherwise at fair value based on published price quotations.

Investments are recognised as financial assets on legal completion of the investment contract and are de-recognised on legal completion of the sale of an investment.

Dividend income is not recognised as part of the fair value movement of an investment, but is recognised separately as investment income through the other distributable reserve when a share becomes ex-dividend.

In accordance with the requirements of FRS 102, those undertakings in which the Company holds more than 20 per cent. of the equity as part of an investment portfolio are not accounted for using the equity method. In these circumstances the investment is measured at fair value through profit and loss.

Notes to the condensed Financial Statements (continued)

Investment income

Unquoted equity income

Dividend income is included in revenue when the investment is quoted ex-dividend.

Unquoted loan stock and other preferred income

Fixed returns on non-equity shares and debt securities are recognised when the Company's right to receive payment and expected settlement is established.

Bank interest income

Interest income is recognised on an accrual basis using the rate of interest agreed with the bank.

Investment management fees and other expenses

All expenses have been accounted for on an accruals basis. Expenses are charged through the other distributable reserve except the following which are charged through the realised capital reserve:

- 75 per cent. of management fees are allocated to realised capital reserve. This is in line with the Board's expectation that over the long term 75 per cent. of the Company's investment returns will be in the form of capital gains; and
- expenses which are incidental to the purchase or disposal of an investment.

Total recurring expenses including management fees and excluding performance fees will not exceed 3 per cent. of net asset value of the Company at year end.

Performance incentive fee

In the event that a performance incentive fee crystallises, the fee will be allocated between other distributable and realised capital reserves based upon the proportion to which the calculation of the fee is attributable to revenue and capital returns.

Taxation

Taxation is applied on a current basis in accordance with FRS 102. Current tax is tax payable (refundable) in respect of the taxable profit (tax loss) for the current period or past reporting periods using the tax rates and laws that have been enacted or substantively enacted at the financial reporting date. Taxation associated with capital expenses is applied in accordance with the SORP.

Deferred tax is provided in full on all timing differences at the reporting date. Timing differences are differences between taxable profits and total comprehensive income

as stated in the financial statements that arise from the inclusion of income and expenses in tax assessments in periods different from those in which they are recognised in the financial statements.

Reserves

Share premium

This reserve accounts for the difference between the price paid for shares and the nominal value of the shares, less issue costs and transfers to the other distributable reserve.

Capital redemption reserve

This reserve accounts for amounts by which the issued share capital is diminished through the repurchase and cancellation of the Company's own shares.

Unrealised capital reserve

Increases and decreases in the valuation of investments held at the year end against cost are included in this reserve.

Realised capital reserve

The following are disclosed in this reserve:

- gains and losses compared to cost on the realisation of investments;
- expenses, together with the related taxation effect, charged in accordance with the above policies; and
- dividends paid to equity holders.

Other distributable reserve

The special reserve, treasury share reserve and the revenue reserve were combined in 2012 to form a single reserve named other distributable reserve.

This reserve accounts for movements from the revenue column of the Income statement, the payment of dividends, the buyback of shares and other non-capital realised movements.

Dividends

Dividends by the Company are accounted for in the period in which the dividend is paid or approved at the Annual General Meeting.

10. Commitments and contingencies

As at 30 September 2015, the Company was committed to making further investment of:

- Shinfield Lodge Care Limited, £3,000,000
- Ryefield Court Care Limited, £1,773,000
- Active Lives Care Limited, £1,470,000

There are no contingencies or guarantees of the Company as at 30 September 2015 (30 September 2014 and 31 March 2015: nil).

Notes to the condensed Financial Statements (continued)

11. Post balance sheet events

Since 30 September 2015 the Company has had the following material post balance sheet events:

- Investment of £525,000 in Shinfield Lodge Care Limited
- Investment of £392,000 in The Stanwell Hotel Limited
- Investment of £300,000 in Active Lives Care Limited
- Investment of £150,000 in Ryefield Court Care Limited
- Investment of £22,000 in The Weybridge Club Limited
- Proceeds of £81,000 received from the repayment of loan stock in Kew Green VCT (Stansted) Limited

On 17 November 2015 the Company announced the publication of a prospectus in relation to an offer for subscription for new Ordinary shares. Albion Venture Capital Trust PLC is aiming to raise circa £4.25 million out of a target of £25.5 million in aggregate that the Albion VCTs are seeking to raise. In addition, the Board may elect to allot up to a further £1.75 million if there is sufficient demand and the Board deems it prudent to do so. The proceeds will be used to provide further resources at a time when a number of attractive investment opportunities are being seen. A Securities Note, which forms part of the Prospectus, will be sent to shareholders shortly.

12. Related party transactions

Other than transactions with the Manager as described in Note 5, there are no other related party transactions.

13. Going concern

The Board's assessment of liquidity risk remains unchanged since the last Annual Report and Financial Statements for the year ended 31 March 2015, and is detailed on pages 49 and 50 of those accounts. The Company has adequate cash and liquid resources. The portfolio of investments is diversified in terms of sector, and the major cash outflows of the Company (namely investments, dividends and share buy-backs) are within the Company's control. Accordingly, after making diligent enquiries, the Directors have a reasonable expectation that the Company has adequate resources to continue in operational existence for the foreseeable future. For this reason, the Directors have adopted the going concern basis in preparing this Half-yearly Financial Report and this is in accordance with 'Going Concern and Liquidity Risk: Guidance for Directors of UK Companies 2009' published by the Financial Reporting Council.

14. Other information

The information set out in this Half-yearly Financial Report does not constitute the Company's statutory accounts within the terms of section 435 of the Companies Act 2006 for the periods ended 30 September 2015 and 30 September 2014, and is unaudited. The information for the year ended 31 March 2015 does not constitute statutory accounts within the terms of section 435 of the Companies Act 2006 but is derived from the audited statutory accounts for the financial year, which were unqualified and which have been delivered to the Registrar of Companies. The Auditor reported on those accounts; their report was unqualified and did not contain a statement under s498 (2) or (3) of the Companies Act 2006.

15. Publication

This Half-yearly Financial Report is being sent to shareholders and copies will be made available to the public at the registered office of the Company, Companies House, the National Storage Mechanism and also electronically at www.albion-ventures.co.uk/ourfunds/AAVC.htm.
